1. Buat tabel

- tbl_karyawangudang

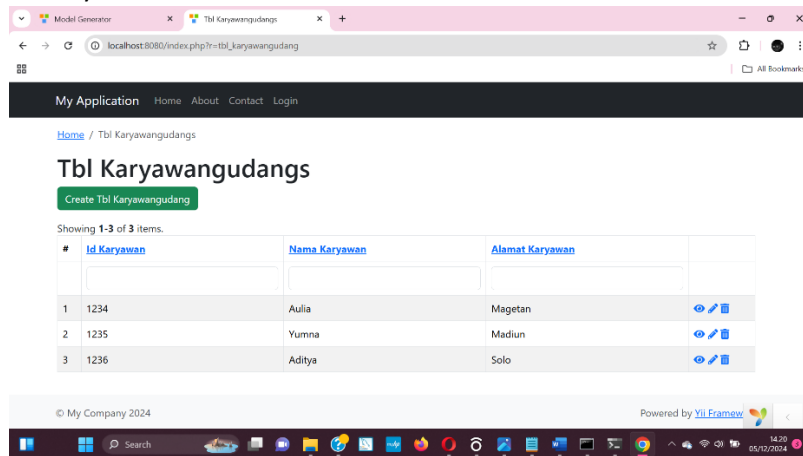

- Model generator

- CRUD generator

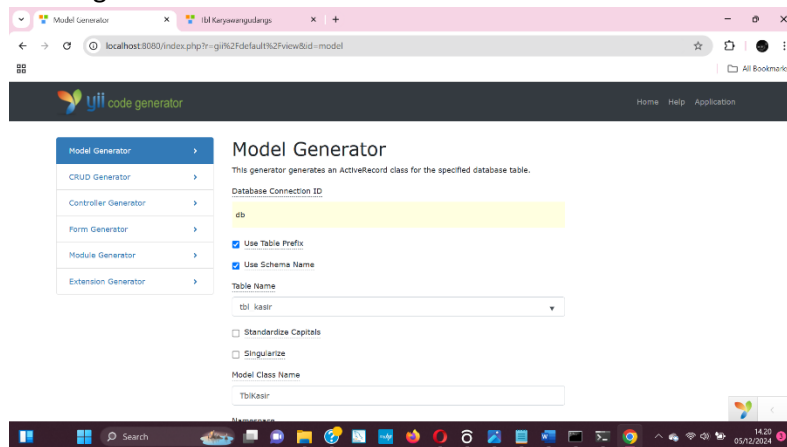

- Hasilnya

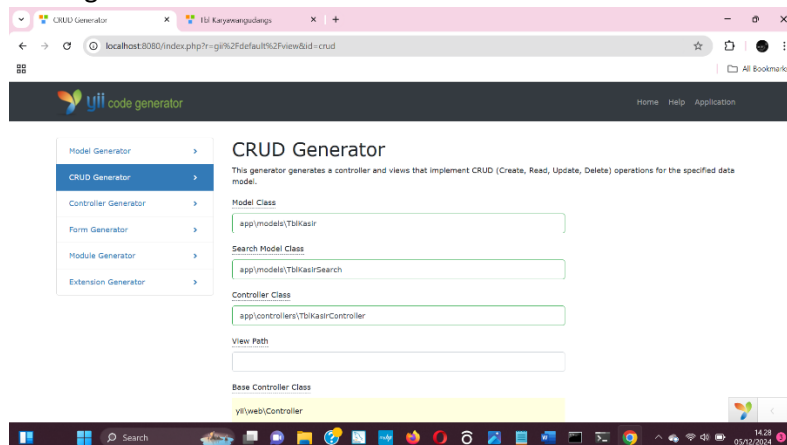

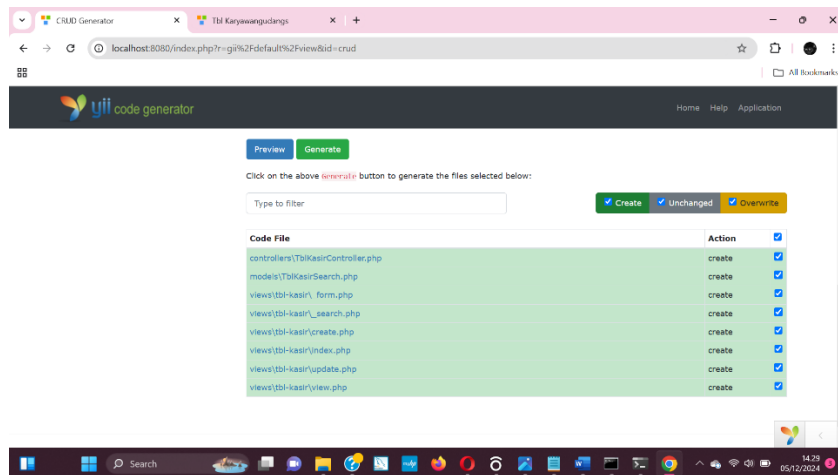

- tbl_kasir

- Model generator

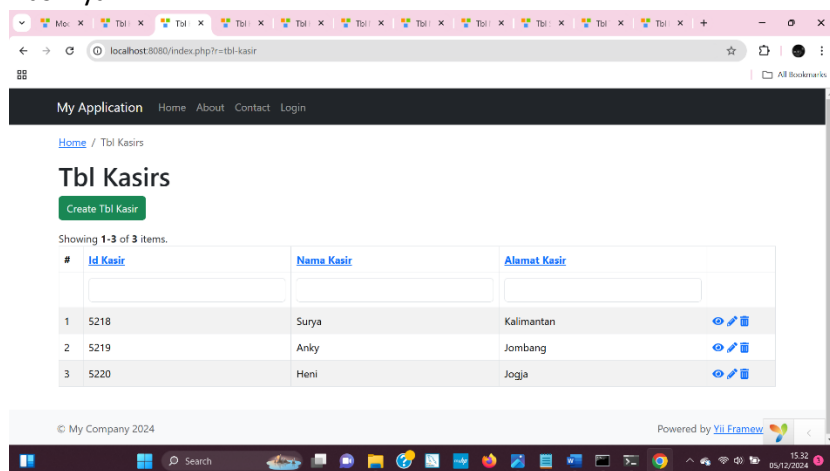

- CRUD generator

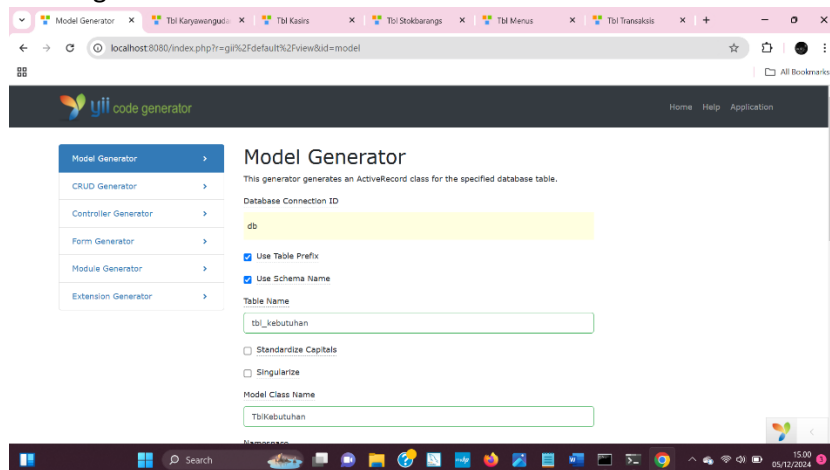

• Hasilnya

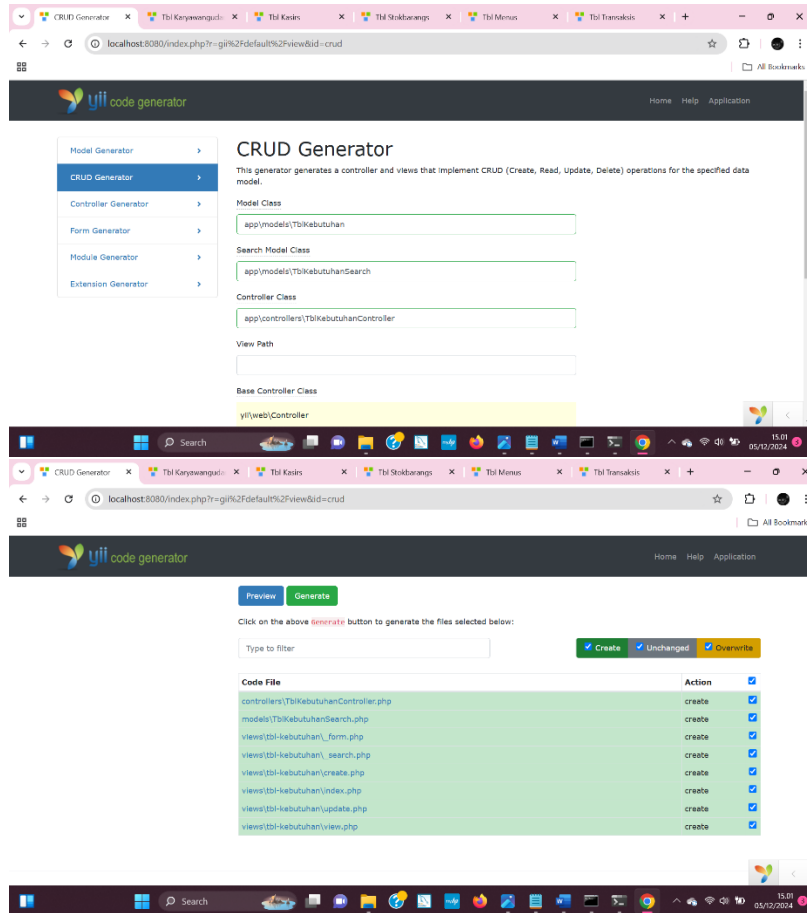

- tbl_kebutuhan

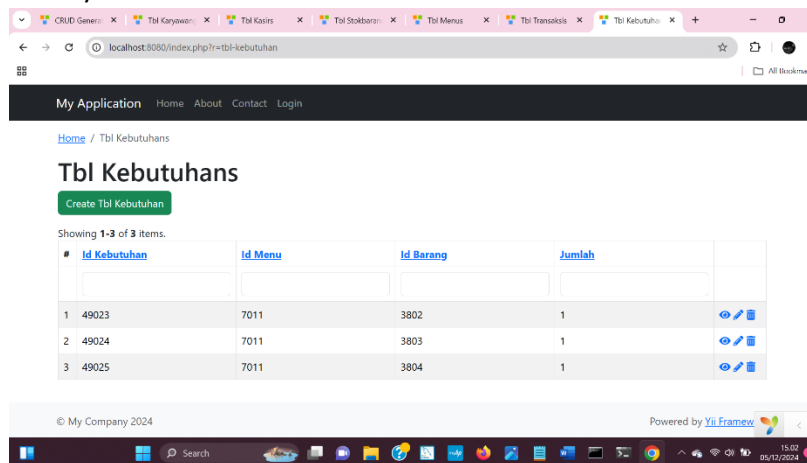

• Model generator

- **CRUD generator**

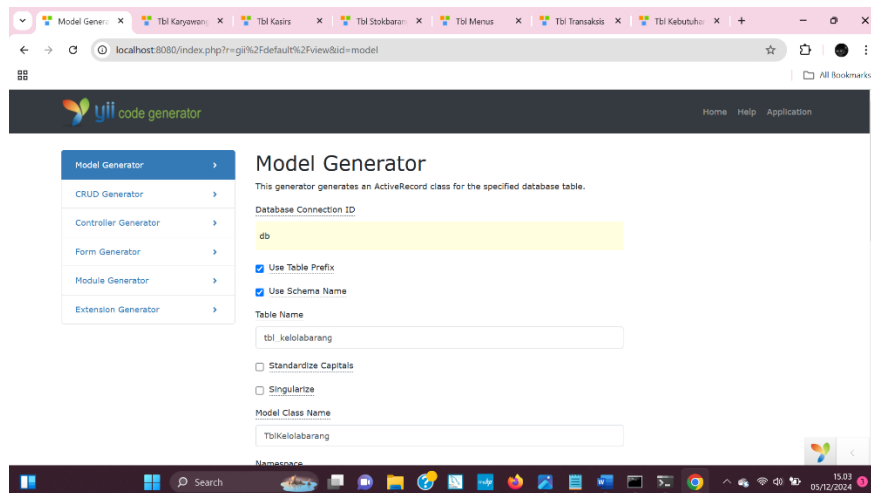

- **Hasilnya**

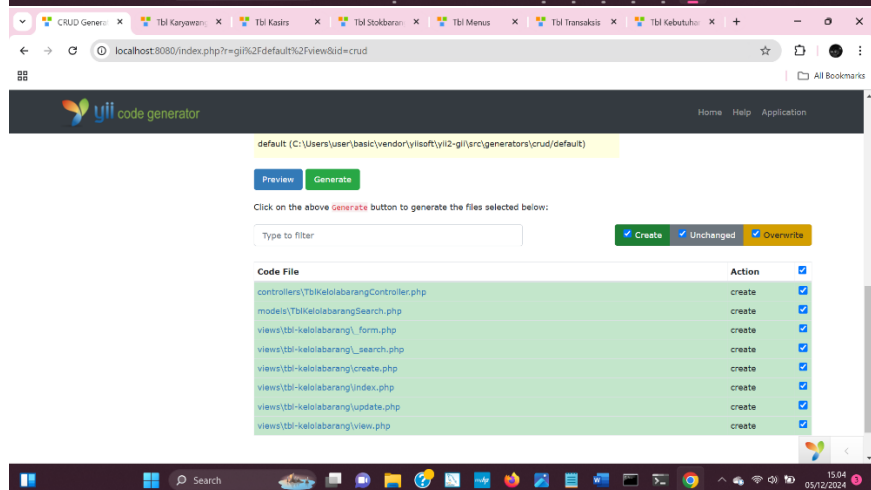

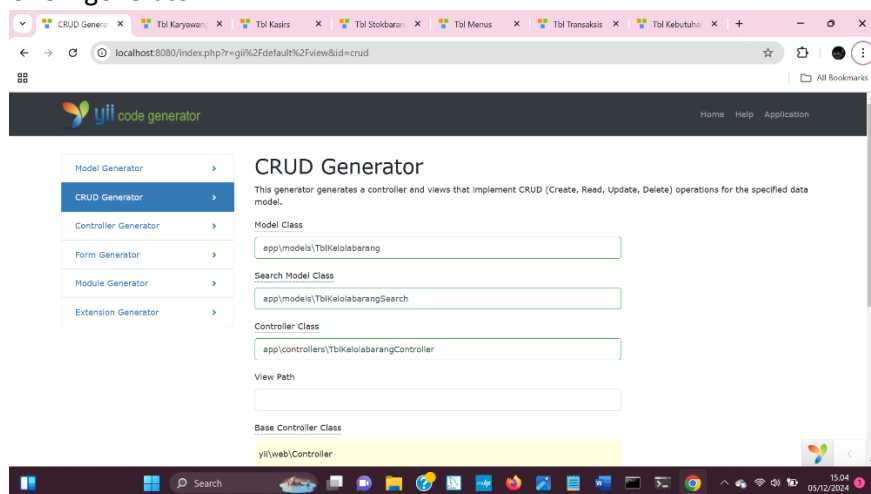

- **tbl_kelolabarang**

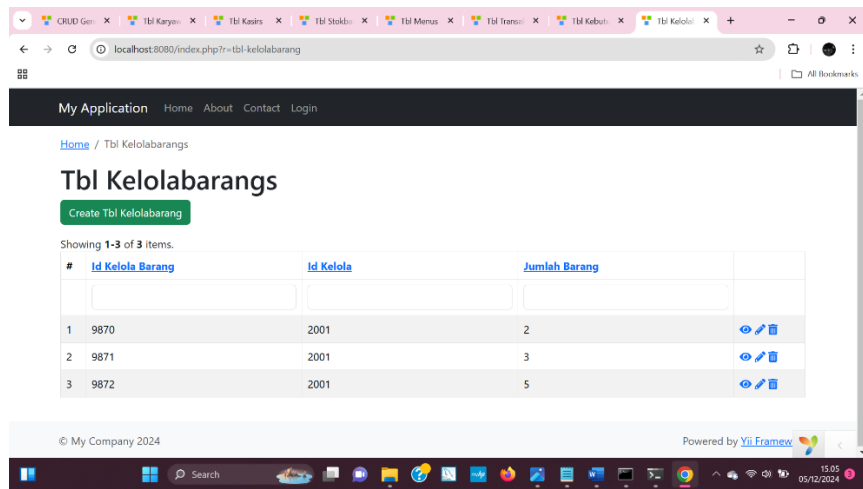

- **Model generator**

- **CRUD generator**

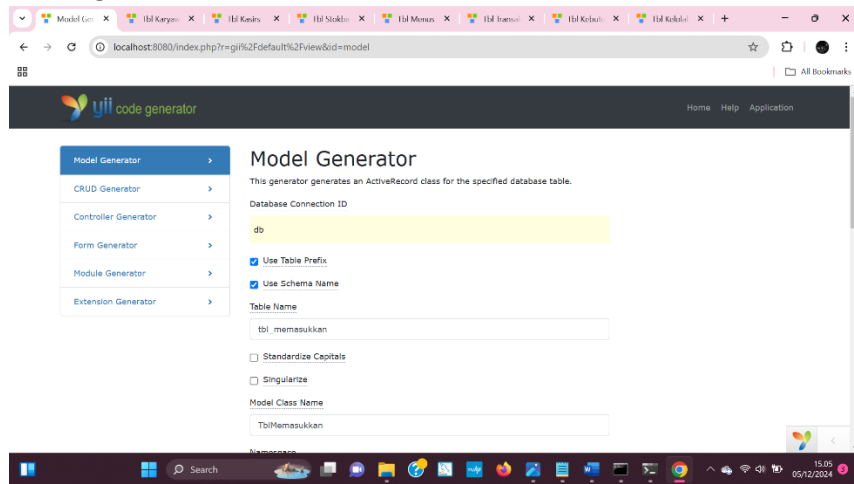

- **Hasilnya**

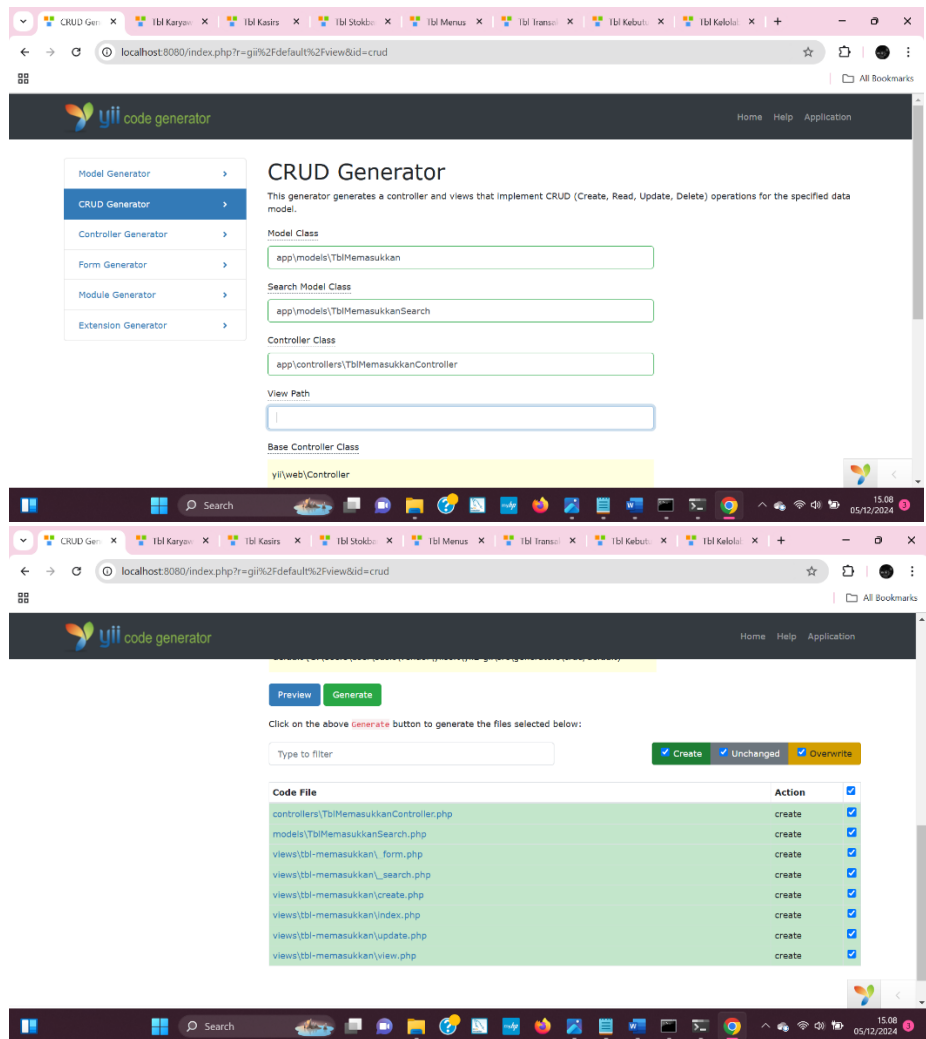

- tbl_memasukkan

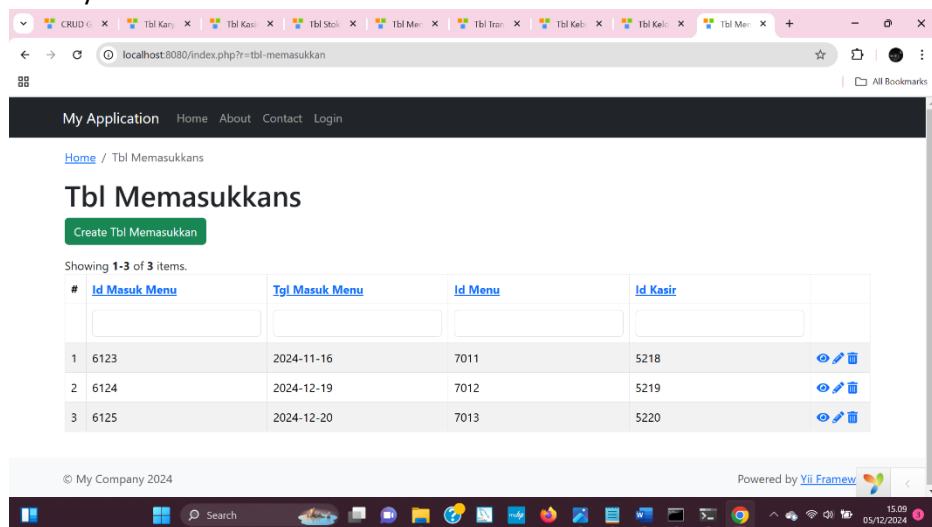

- Model generator

- CRUD generator

• Hasilnya

- tbl_mengelola

- Model generator

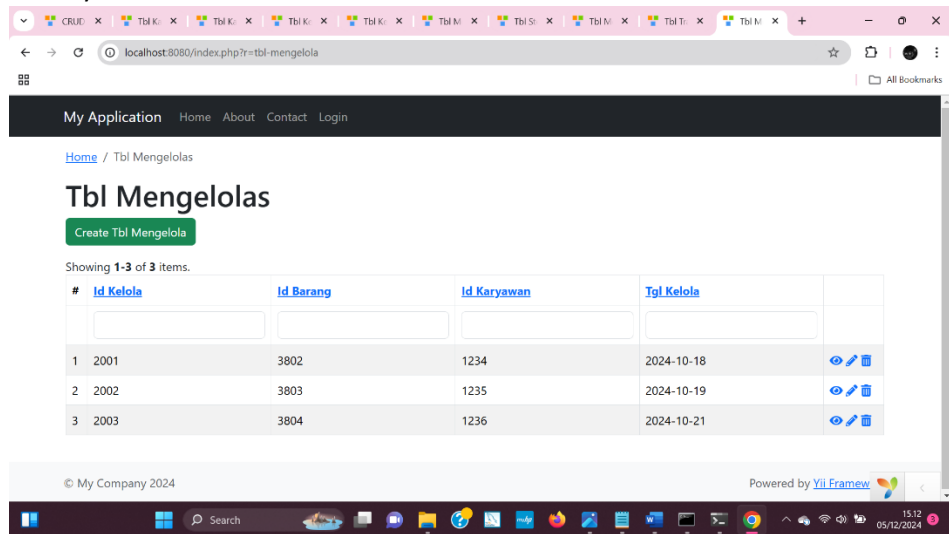

The screenshot shows the 'Model Generator' interface of the Yii2 Code Generator. The left sidebar contains a menu with 'Model Generator' selected. The main area has the title 'Model Generator' and a description: 'This generator generates an ActiveRecord class for the specified database table.' Below this, the 'Database Connection ID' is set to 'db'. The 'Use Table Prefix' and 'Use Schema Name' checkboxes are checked. The 'Table Name' field contains 'tbl_mengelola'. The 'Standardize Capitals' and 'Singularize' checkboxes are unchecked. The 'Model Class Name' field contains 'TblMengelola'.

- CRUD generator

The screenshot shows the 'CRUD Generator' interface of the Yii2 Code Generator. The left sidebar contains a menu with 'CRUD Generator' selected. The main area has the title 'CRUD Generator' and a description: 'This generator generates a controller and views that implement CRUD (Create, Read, Update, Delete) operations for the specified data model.' Below this, the 'Model Class' field contains 'app\models\TblMengelola'. The 'Search Model Class' field contains 'app\models\TblMengelolaSearch'. The 'Controller Class' field contains 'app\controllers\TblMengelolaController'. The 'View Path' field is empty. The 'Base Controller Class' field contains 'yii\web\Controller'. Below the form, there are 'Preview' and 'Generate' buttons. A message says 'Click on the above Generate button to generate the files selected below:'. Below this, there is a 'Type to filter' input field and three buttons: 'Create', 'Unchanged', and 'Overwrite'. A table lists the files to be generated:

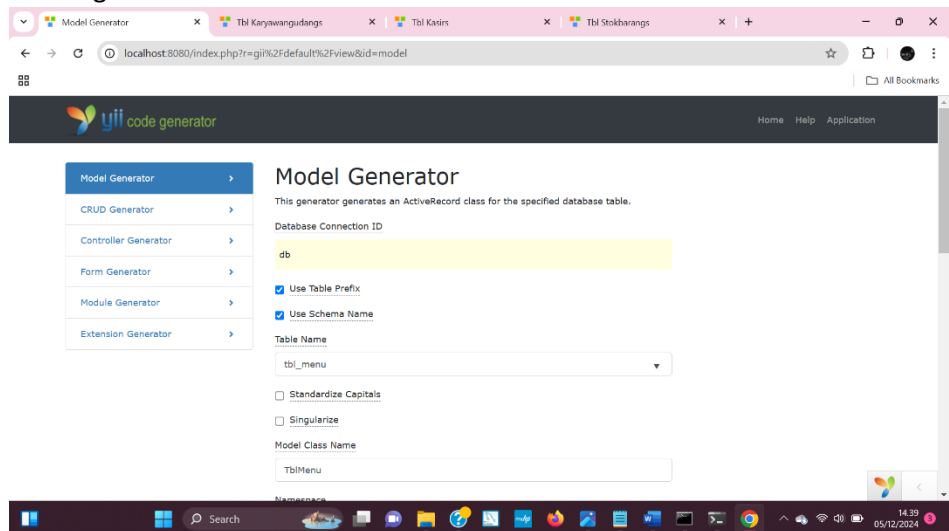

Code File	Action	Checkbox
controllers\TblMengelolaController.php	create	<input checked="" type="checkbox"/>
models\TblMengelolaSearch.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola_form.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola_search.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola\create.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola\index.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola\update.php	create	<input checked="" type="checkbox"/>
views\tbl-mengelola\view.php	create	<input checked="" type="checkbox"/>

- Hasilnya

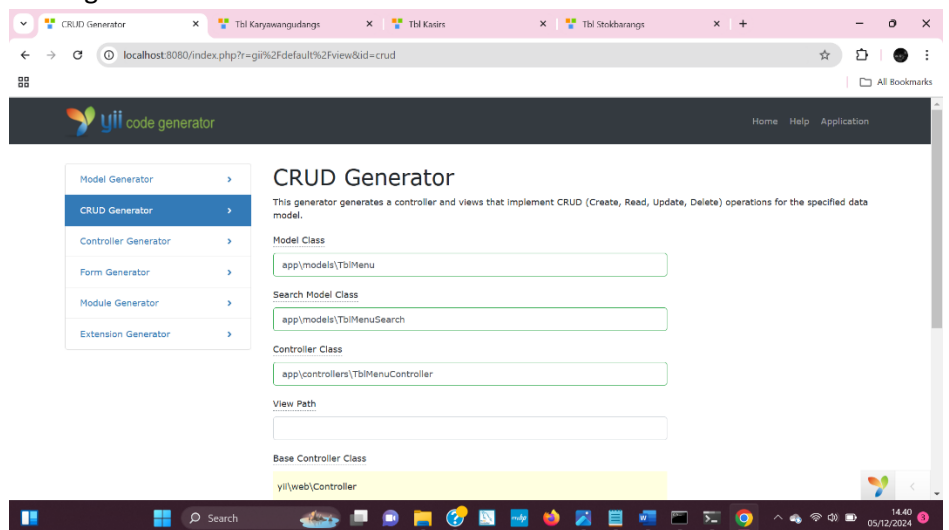

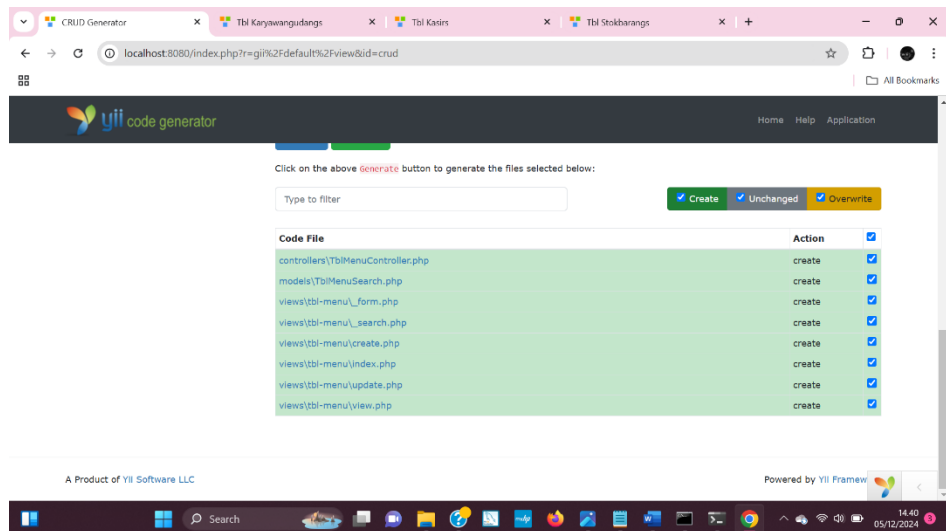

- tbl_menu

- Model generator

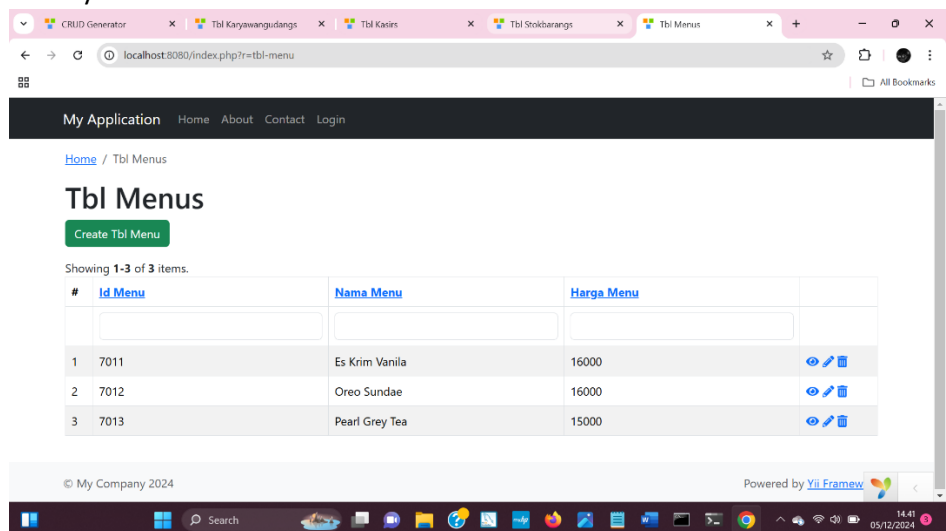

- CRUD generator

- tbl_pembelian

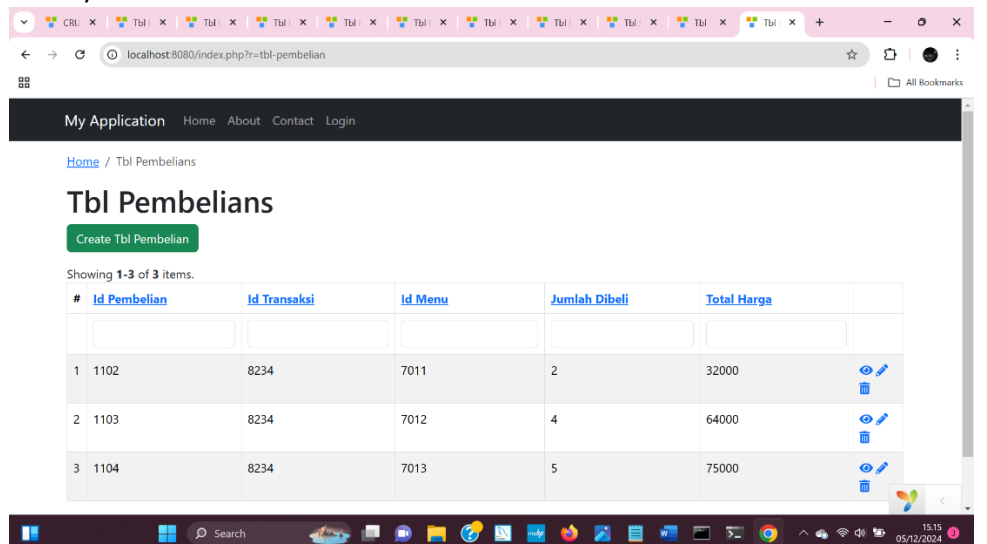

• Model generator

• CRUD generator

• Hasilnya

- tbl_stokbarang

- Model generator

The screenshot shows the 'Model Generator' interface of the Yii2 Code Generator. The left sidebar contains a menu with 'Model Generator' selected. The main area has the title 'Model Generator' and a description: 'This generator generates an ActiveRecord class for the specified database table.' The form includes the following fields and options:

- Database Connection ID:** db
- Use Table Prefix:** ☒
- Use Schema Name:** ☒
- Table Name:** tbl_stokbarang
- Standardize Capitals:** ☐
- Singularize:** ☐
- Model Class Name:** TblStokbarang

- CRUD generator

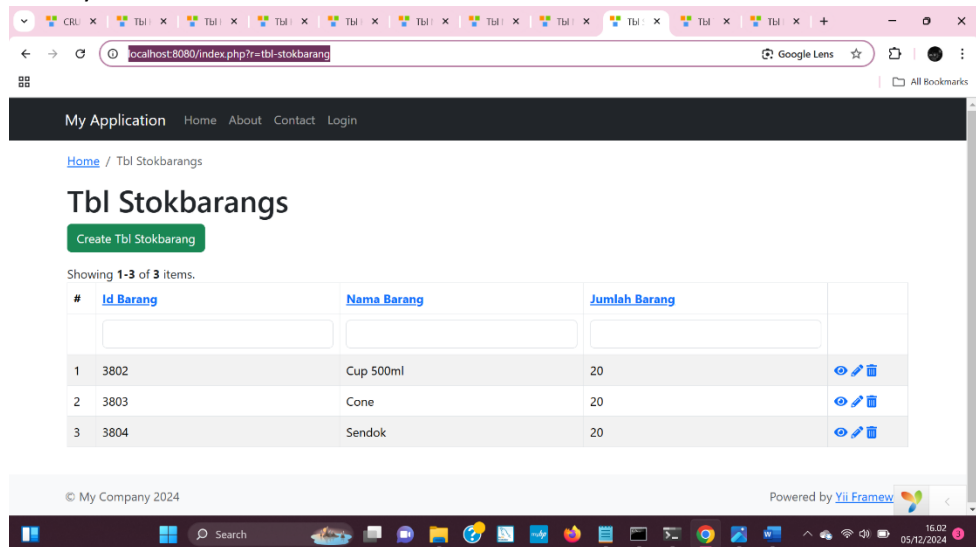

The screenshot shows the 'CRUD Generator' interface of the Yii2 Code Generator. The left sidebar contains a menu with 'CRUD Generator' selected. The main area has the title 'CRUD Generator' and a description: 'This generator generates a controller and views that implement CRUD (Create, Read, Update, Delete) operations for the specified data model.' The form includes the following fields and options:

- Model Class:** app\models\TblStokbarang
- Search Model Class:** app\models\TblStokbarangSearch
- Controller Class:** app\controllers\TblStokbarangController
- View Path:** (empty field)
- Base Controller Class:** yii\web\Controller

The screenshot shows the file generation summary screen of the Yii2 Code Generator. It displays a table of files to be generated and their actions.

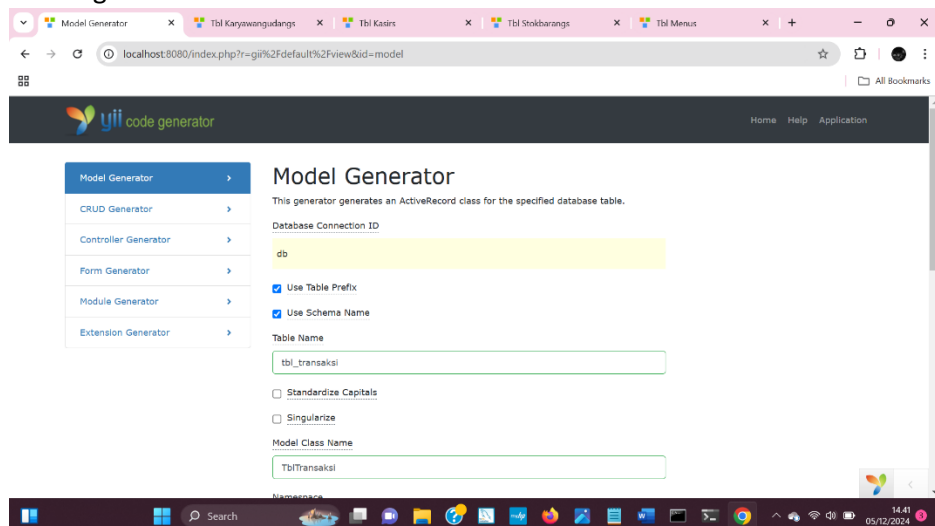

Code File	Action
controllers\TblStokbarangController.php	create
models\TblStokbarangSearch.php	create
views\tbl-stokbarang_form.php	create
views\tbl-stokbarang_search.php	create
views\tbl-stokbarang\create.php	create
views\tbl-stokbarang\index.php	create
views\tbl-stokbarang\update.php	create
views\tbl-stokbarang\view.php	create

- Hasilnya

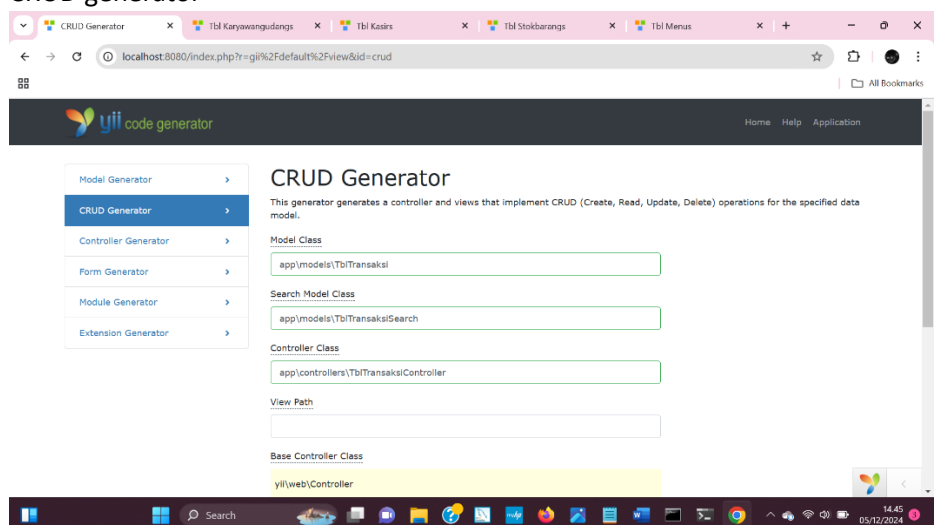

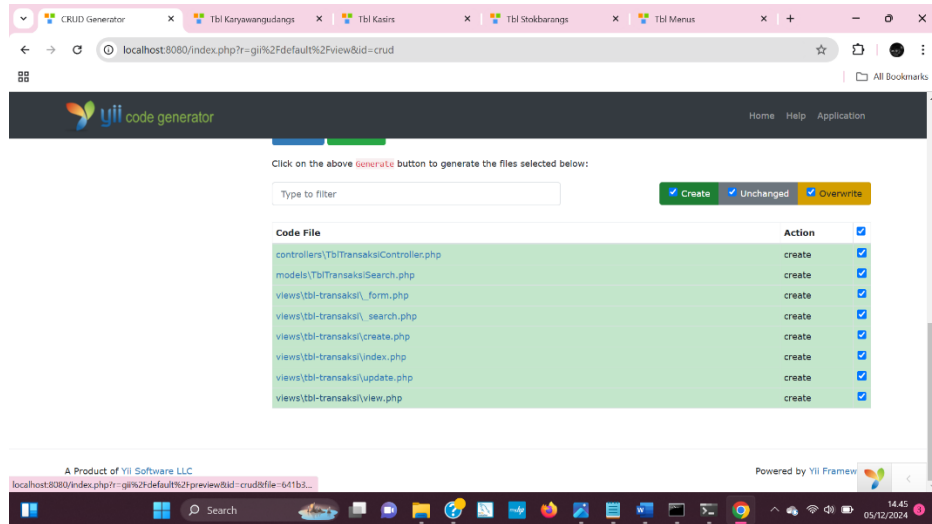

- tbl_transaksi

- Model generator

- CRUD generator
